Asset Tracker

Product Description

This Solar GPS Cargo Lock Asset Tracker is specifically designed for outdoor equipment monitoring within telematic systems. With its long-lasting battery and high-efficiency solar charging, it's ideal for tracking and securing assets such as containers, trailers, and trucks. The solar-powered E-lock sends alerts to the server for events like rope cutting, locking, and unlocking. Additionally, the Cargo Lock can be unlocked both remotely and in close proximity using RFID, BLE, or via network and SMS commands.

Product Features

- Built-in Strong Magnet
- BLE 5.1 Optional
- IP67 Rugged Design
- 14400mAh Rechargeable Battery
- Alerts-Locking, unlocking, rope-cutting, motion
- Native Geotab Integration

CONTAINER MONITORING

Fueling your fleet with intelligence.

Product Specifications

Dimensions

8.17 x 4.39 x 1.9in

207.5mm x 110.2mm x 48.1mm

Weight

37oz

1050g

Operating temperature

-13°F to 176°F

-25°C to +80°C

IP Rating

IP67

Installation

Built-In Magnet

Bluetooth

Optional BLE 5.1 Connectivity

Charging

Solar Panel and Customized USB Cable

Connectivity

LTE FDD Cat M1: B1/B2/B3/B4/B5/B8/B12/B13/
B18/B19/B20/B25/B26/B27/B28/B66/B85

Alerts

Locking, unlocking, rope-cutting, motion

LED indication

Network, GNSS, RFID, and Battery

Rope

Rope 400mm (standard)
