

SAT14-GTO

Product Description

The SAT14-GTO satellite asset tracker is a versatile, compact, weatherproof asset tracker with extraordinary capabilities. Satellite-based GPS equipment tracking has been around for years, but for many equipment types, previous hardware options were too big or expensive. With its compact size and tough build, the SAT14-GTO is ideal for all types of field equipment and shipping containers. The device, paired with leading software, helps minimize lost revenue, recover lost and misplaced equipment, reduce underutilized equipment, verify billing, and efficiently retrieve and manage inventory.

- The world's smallest industrial-grade GPS satellite tracker
- Long battery life
- Optional mounting bezel for added protection in the field
- Hermetically-sealed construction for high reliability and protection
- Maintenance free
- Great for remote locations where cellular service is unreliable or spotty
- Excellent asset tracking with worldwide service
- Great for shipping containers, trailers, rail cars, dumpsters, bulk containers and more!
- Global star Satellite Network for high-level accuracy

PRODUCT SPECIFICATIONS

DIMENSIONS

2.80x2.80x1.25 w/o bezel 4.65x3.37x1.32 w/bezel

WEIGHT

44lb without bezel 1.80 with metal bezel

IP/INGRESS RATING:

IP-68, IP69, MIL-STD-810G

INPUT VOLTAGE

5V 2amp

OPERATING TEMPERATURE

-40° to +85° C (operation)

ESTIMATED BATTERY LIFE

Up to 9 years, based on reporting intervals

INPUTS/OUTPUTS AVAILABLE:

None

IMMERSION

MIL-STD-810G: 512.5 to 160ft (50 meters)

SALT FOG EXPOSURE

MIL-STD-810G: 509.5 to 1000 hours

POWER OUTPUT

200mW
